### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blackmer et al (5393236) in view of Kuhn et al (6016471).

As per claims 1,15, and 23, Blackmer et al (5393236) teaches a computer allowing a user to set a pronunciation of a string of characters (Fig. 1 subblock 19) comprising:

“allowing the user to select one or more characters in the string, and retrieving from a database accessible by the computer a plurality of samples.....retrieved samples” as the user selecting string and retrieving the pronunciation (col. 19 lines 1-34);

“allowing the user.....samples, storing a first pronunciation record comprising.....selected by the user” as use storing the user’s pronunciator (col. 19 line 50 - col. 20 line 10).

Blackmer et al (5393236) does not explicitly teach training the recognition system for pronunciations, however, Kuhn et al (6016471) teaches incorporating the pronunciation aspect into existing systems (abstract, col. 5 lines 10-31). Therefore, it would have been obvious to one

Art Unit: 2655

of ordinary skill in the art of pronunciation recognition to modify the teachings of Blackmer et al (5393236) with training an existing recognition system because it would advantageously provide useful feedback to the user with respect to pronunciation accuracy (Kuhn et al (6016471), col. 5 lines 25-32).

As per claims 2 and 16, Blackmer et al (5393236) teaches comprising:

“generating a pronunciation.....outputting the generated pronunciation” as audible output of the pronunciation (col. 19 lines 40-45)

As per claims 3 and 17, Blackmer et al (5393236) teaches allowing the user to select another of the displayed samples after audibly outputting the generated pronunciation as selecting the displayed pronunciation (col. 19 lines 40-45)

As per claims 4 and 18, Blackmer et al (5393236) teaches “allowing the user to select a second of the displayed samples.....selected by the user” as user selecting a second record (col. 19 lines 40-45)

As per claims 5 and 19, Blackmer et al (5393236) teaches “during a text to speech process.....pronunciation records” as choosing playing the pronunciation record (col. 19 lines 28-39)

As per claims 6-8, and 20-22, Blackmer et al (5393236) teaches “associating the first and second pronunciation files with first and second objects,.....recognizing a pronunciation of the string of characters by a user.....associating the first and second pronunciation files with first and second objects.....pronunciation record” as samples stack, personal stack, and comparing both (col. 9 lines 36 - col. 10 line 45)

Art Unit: 2655

As per claim 9, Blackmer et al (5393236) teaches allowing the user to identify a part of the character string as a separate syllable.....the identified syllable as storing 2 separate syllables (col. 22 lines 20-25)

As per claim 10, Blackmer et al (5393236) teaches identifying strings by accents (col. 22 lines 18-31)

As per claim 11, Blackmer et al (5393236) teaches input character string (fig. 10c)

As per claim 12, Blackmer et al (5393236) teaches the user to select the character string (fig. 10c)

As per claim 13, Blackmer et al (5393236) teaches allowing the user to selected a preferred language (Fig. 8)

As per claim 14, Blackmer et al (5393236) teaches selecting a second language (as choosing from multiple languages, Fig. 9)

### ***Response to Arguments***

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
